## Heroism of Ivor Jones in Drumbeller Mine Explosion

Rushed Into Gas-Laden Atmosphere to Save Comrades and Rescuers Lost Sight of Him—

Hugh McDougall, one of the victims of the explosion in Naemine mine, Drumbeller, was well known to many Coleman people, he having resided here several years ago. He leaves a widow and seven children. The funeral was held last Thursday, service being at St. Anthony's Catholic church. Accumulation of gas in the mine workings is said to have caused the explosion, ignition taking place during the firing of shots to bring down the coal. During rescue work two canaries were taken below for the purpose of detecting monoxide gas. One failed to survive the ordeal and died on reaching the gas laden atmosphere.

Ivor Jones, pit boss, who was not killed by the explosion, gave his life in efforts to save McDougall and McLeod. Repeatedly he tried to get to the spot where they were, the Drumbeller Mail reporting as follows:

The heroism of the late Ivor Jones will go down in the mining history of this valley, long to be remembered. Mr. Jones sacrificed his life in an effort to save two others. Of the five men working in the mine, Jones was furthest away from the blast, but rushed to his comrades' aid immediately following the thunderous report, taking no heed of what might become of himself in the gas-laden atmosphere. Twice he was overcome by gas inhalation and was dragged three hundred feet away by J. Thomson, who had gone down the mine with two other miners with the object in view of rendering what assistance might be with in their power before the arrival of the mine rescue crews. Jones, however, persisted in trying to reach McDougall and McLeod, whom he realized, if not already dead, were in grave danger. The three men who had attempted to render aid, were slowly being overcome by gas and realizing that they could not hold out much longer, retreated to safety; they had also lost sight of Jones by this time.

## McBain's Lake Summer Resort

THE most beautiful spot in East Kootenay and an ideal place to spend a vacation that will benefit you in health and give a maximum of pleasure.

All-weather highway and close to railroad.

For rates on cottages and accommodations, apply to

MRS. C. ROSEN, Manager  
McBain's Lake Summer Resort  
Jaffray P.O., British Columbia

## 8 per cent Discount on Current Town Taxes

will be allowed up to 4 p. m. on Saturday, June 30, 1934. This does not include Supplementary Revenue Taxes. Take advantage of this opportunity to save, and pay promptly.

JAMES FORD, Secretary-Treasurer.

## Italian Hall Re-Opening

The Italian hall grand re-opening dance on Monday evening will attract a large number of people from the Pass towns. The hall has been remodelled and splendidly finished, making it very attractive, with newly polished floor and a small stage built in for the orchestra, while by day it is amply lighted by natural light and at night large electric lamps will give a fine appearance.

The Journal compliments the Italian Society on their enterprise, for their building on Main street is a splendid improvement and an evidence of community spirit and faith in Coleman.

## Schools Close on June 29—Re-Open August 29

High School Enrolment Now Double That of 1927 States Principal Hoyle

School will be over to-morrow. The two months vacation will be hailed with delight by teachers and pupils, and already many are on their way or planning on leaving for summer camps or seaside resorts.

In 1927 the school board engaged its third high school teacher, and it is likely that following the holidays accommodation will be crowded, as the enrolment doubled in recent years. Those leaving will more than be replaced by promotion from the lower grades.

All teachers have been re-engaged. Principal Hoyle will go to Edmonton for several days to mark papers.

## Town Council Notes

Met on Tuesday evening, and decided final discount date on current taxes be Saturday, June 30. H. Snowden was given a contract for renovation of interior of town hall and to paint new woodwork on the exterior.

A post on Second street in the middle of the road will be taken out, as it is dangerous for traffic. A license restaurant was authorized to an applicant who will rent part of the ground floor of the new Italian hall.

Efforts are being made to obtain from the Canadian Pacific per permission to use a portion of their right-of-way for pedestrian traffic around the rock bluff on the highway.

All members were present with exception of F. Antrobus, who was attending another meeting.

## ST. PAUL'S UNITED CHURCH

On Sunday a combined service of the Sunday school and congregation at 11 a. m., a patriotic service to commemorate Dominion Day. Guides and Scouts will attend. Subject for the evening service—"What God Hates Most."

Mr. and Mrs. J. A. McLeod and R. F. Barnes were in Lethbridge over the week end playing in the golf competitions.

## OUR BIRTHDAY . . . . .

Sunday, July 1, marks the commencement of the eighth year since The Journal was purchased by the present proprietor; also it is his birthday too—an occasion deserving of a double celebration and another to boot for Dominion Day.

We review the seven years of our residence in Coleman with considerable pleasure. True, conditions have changed, but they always will as the years pass. Man must adapt himself to the changing scenes of life, and use his own God-given powers to meet the difficulties that these changes bring, for life was never intended by the Supreme Being to be a life of pleasure and ease. Man always has and always will be required to use his own initiative to hold his own.

The seven years of our business life in Coleman have passed all too quickly. Many things we would like to have done were left undone, because business conditions did not warrant extensive improvements we had in mind. However much faith we may possess, one would be foolish to ignore the practical side in planning developments or extension of business.

Coleman has gone through the years of the depression without a business failure of any of its merchants. Though coal shipments have decreased, compared with the years prior to 1928, regular pay-days have always kept cash circulating and so maintained a fair volume of business. Though we do not believe in allowing an atmosphere of self-content to blind us to the necessity of being alert and progressive, yet we feel that this industrial district compares very favorably with other sections of the western provinces, and that for a town of similar size, Coleman has certainly held its own.

With improvement in business generally, it will share in the benefits that may accrue, providing every business man does his share and appreciates the fact that success comes only through planning and work. There is no easy road to the goal of achievement, but there is great pleasure in the reward of ultimate triumph.

## TOWN OF COLEMAN ANNOUNCEMENT

The Mayor and Town Council have been closely occupied for the past three to four months in the matter of the renewal of the Light and Water franchise from the Town of Coleman to the Coleman Light & Water Company, Limited.

Negotiations have been carried on as expeditiously as possible and also with economy by both the town and the company, because any expense connected with this matter ultimately falls upon the citizens in the form of taxation for general expenses, or the consumer in form of operating expense of the company.

Before the final details can be prepared for submission to the Board of Public Utility Commissioners for Alberta, who have the supervision of all such matters, it is necessary that the accounts of the company for the entire period of the present franchise be available.

The town council joined in securing an informal hearing before the Board of Public Utility Commissioners in order that several important preliminary matters relating to the franchise could be disposed of, and as a result of this conference of town and company officials with the Board of Public Utility Commissioners at Lethbridge on June 21 and 22, 1934, the town officials and Coleman Light & Water Co. Ltd. officials are working together, with as little expense as possible; and when the hearings are completed, we hope that the residents of the Town of Coleman will be able to secure better rates for both light and water than we have had in the past.

MAYOR AND COUNCIL.

BABY CARRIAGE for Sale, First-class condition.—Apply Journal Office.

## Coleman Defeats Blairmore Score 3 1

Coleman eased into second place in the Crow League on Saturday evening when they took a 3 1 decision from Blairmore on the local grounds.

Coleman went on the offensive during the first half and gained a two goal lead when Beddington found the net twice. The first goal was a beauty when he hooked the ball over his shoulder to completely fool Fraser to score. He beat two men and kicked the ball past the onrushing goalkeeper for his second goal.

In the second half Coleman let up and as a result Blairmore started a raid on the Coleman goal which ended in Gray scoring. After this goal Blairmore played over their heads during the next twenty minutes and had Coleman defending desperately. Ford being lucky to deflect a ball which was headed for the corner of the net. Coleman finally broke away and a minute later put the game safely away when Brown scored number 3 for Coleman.

Line up:  
Coleman: Ford, Griffiths, Burrell, Gardiner, J. Anderson, Park, Balloch, Fraser, Beddington, Jock Anderson, Brown.

Blairmore: Fraser, Oliver, Kemp, Blas, Morris, Womersley, Spillers, Turner, Vejprava, Petrusini, Gray.

The Caladonian Society social on Friday in the Oddfellows hall was enjoyed by the members, the prize-winners being Mrs. W. Smith, Mrs. Jim Barclay and Mrs. J. O. Smith. The annual picnic will be held on Sunday afternoon on the flat near the McGillivray trestle bridge.

## Further Hearing Light and Water Rates, July

Auditors in Meantime Will Prepare Figures on Which Basic Rates Will be Fixed

The informal hearing before Judge Carpenter, of the Board of Utilities Commissioners, at Lethbridge, regarding the readjustment of terms of the franchise between Coleman Light & Water Co. Ltd. and the Town of Coleman has not produced any information as to changes in the rates.

It was in reality a preliminary to another hearing by the Board to be held in July. Auditors for the company and the town will prepare figures on which basic rates will be calculated. Unofficially, it is learned that the council asks for an all-round reduction, and a longer term of years for amortization, whereby it is claimed by the town representatives a reduction in rates could be made.

Appearing for the company were O. E. S. Whiteside and H. V. Hummel, and for the town E. D. Batrum, official auditor and accountant, Mayor Pattinson, Councillors Chapman and Fred Antrobus and Secretary Ford were present for the town.

## CARD OF THANKS

We wish to express our appreciation and thanks to Drs. Borden and McLean, Mrs. Woods, Nurses Stuart and Moores, also Harry, for attention and care received not only by ourselves during our illnesses in the hospital but especially for the care administered to our little son during his recent operation.—Mr. and Mrs. J. K. Petrusini

## De-Bunking Mysteries

One of the traits which keeps humanity young and adds a zest to the mere act of living, is man's capacity for wonder, his somewhat naive curiosity in freaks, and his enthusiasm for the unusual or phenomenal in nature.

It can scarcely be called a characteristic distinguishing homo sapiens from the beasts of the field or fieside, for the domestic cat or dog (to mention species coming within the range of everyman's experience) shows a strangely similar capacity when confronted with something strange in its immediate environment. By test of paw or teeth, it ascertains whether the new experience is good or bad; just as man will, by more complicated experiments it is true, attempt to rob the mysterious of its mystery.

There is a reason, of course, for this outburst.

Strange, very aquatic monsters have been sighted in diverse corners of the globe. Reports concerning them have been considered of sufficient interest to warrant publication all over the world. A British Columbia lake provided the first thrill of the present series—a thrill which became familiar in everyone's mouth under the euphonious title "Gogopogo". The ocean, not to be outdone by a mere inland lake, immediately produced another of these strange denizens of remote waters, which, christened "Cachodorusaurus" to fix the credit of its habitat to Vancouver Island, quickly acquired a popular name. As "Cady" it attracted as much attention from reporters and the general public, during its brief occupancy of the spotlight, as have the Quebec quinquets of more recent and certain origin.

France next came to hat with a claim on behalf of its particular pet, seen as though a glass darkly, but acclaimed a monster, a freak, a lunatic, a rature, or a throwback. The world was agog with speculation as to what manner of things these visioned creatures were.

The sea serpent of myth and anecdote never attained such reputation as the new genera. The sea serpent was too easily explained. It was either a snake which had strayed from its forest lair to essay adventure on the briny deep, or it was the gnarled and twisted trunk of a fair sized sapling which ocean currents induced with similitude of life.

This was less easily explained. Its discoverer, whether in British Columbia, France, Scotland, Brazil or elsewhere—all stressed the fact "Gogopogo", "Cady" or what-have-you, was different! Scientists were interviewed by representatives of the popular press and, in unguarded moments suggested it was a relic of pre-historic times hurried across the ages, in some inexplicable way, into A.D. 1933 or 34.

It is to be regretted that Scotland should have been visited by one of these unknowns. The hard-headed Scot, on occasions such as the anniversary of Burns, may indeed be prone to vain imaginings and uncanny visions, but in his normal state, he is essentially, "from Missouri". Loch Lomond, which has inspired many poems, caught the fashion. It produced a freak seen from its "bonny banks". But when Loch Ness sought to uphold the dignity of salt-water, there was too much for the practical race north of the Tweed. It (the Loch Ness monster) was photographed—and strange, indeed, it looked! A scientist subjected the picture to photographic scrutiny—and the mystery was gone. It was, in his opinion, the photograph of the fluke of a killer-whale, too modern an animal, forsooth, to be acclaimed in competition with the million year throwbacks which imagination had created.

Until another wave of freak discoveries hit the pages of our newspapers, then, we must content ourselves with Alley Oop's dinosaur as a constant reminder of things that were before man was endowed with his amazing capacity to wonder.

## Air Base For Bermuda

## Regular Service Planned Between Quarantined Islands And Mainland

Bermuda is going right ahead with its provisions to establish an air base. Legislation has been prepared to assist Imperial Airways to operate a regular service between these islands and the mainland.

The two islands, Darrel's and Eurt's, part of Warwick Parish, "vested in her late Majesty Queen Victoria her heirs and successors forever for quarantine purposes," have been appropriated as landing bases.

The government would contribute £15,000 for construction and equipment of the port, according to the bill before parliament.

A maximum of £5,620 would be paid to Imperial Airways each year for upkeep of the flying service. The sum would be paid to that company either alone "or in conjunction with another company or organization giving service by aircraft between these islands of the North American continent."

All plant supplies and equipment used in construction would be admitted free by the government. The provisions would remain in force until December, 1940, the bill provides.

Light rays, X-rays, heat rays and wireless rays all travel at the same speed but vary in length.

## Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the looseness of the bowels, and thus away with the suffering, the weakness, and often times the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and bracing up the weakened system, thus making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 88 years—you do not experiment when you use it.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

## X-Ray Motion Pictures

## Newly Perfected Camera Shows Bones In Process Of Kitting

Broken bones are now shown in the process of knitting by x-ray motion pictures which are made by a new camera perfected by Doctor Arthur C. Pillsbury, naturalist and photographer of the University of California. Doctor Pillsbury's camera works on the same principle as the one used to photograph the unfolding of flowers, taking a series of single pictures at intervals, of a movement imperceptible to the human eye, and then running them off as motion pictures to show movements which may have taken several days, all encompassed in a few moments. The first motion picture made with the x-ray camera showed the growth in the interior of a rose. It took seventy-two hours to film, as only one picture at a time could be made in intermittent exposures. To avoid damaging the rose during the filming Doctor William D. Coolidge, inventor of the Coolidge tube, designed a special x-ray tube.

## LETTER FROM A MAN OF 90

## About His Rheumatism

He asks us to excuse his writing. We do more than that—we congratulate him on being able to write at all at his age, especially as he has been suffering from rheumatism. This is what he says in his letter:—

"Three years ago I was in bed for six weeks with inflammatory rheumatism. At that time I have been taking Kruschen Salts, and have not had another attack. But my hands are still somewhat stiff. I take Kruschen every morning before breakfast, and shall continue to do so, because I am sure it has kept me in good shape for three years. Excuse this writing, as I am ninety years old, and use both hands to write."—J. R. G.

Kruschen dissolves away those needle-pointed crystals of uric acid which are the cause of all rheumatic troubles. It will also flush these dissolved crystals clean out of the system. Then if you keep up "the little daily dose," excess uric acid will never form again.

## Postal Rocket Tested

## Will Speed Delivery Between Britain France And Ireland

The world's first postal rocket has been tried out near London by the postal authorities and judged successful.

Deep secrecy veiled the experiment with the rocket, which, invented by Gerhard Zucker, German expert, was said to be the forerunner of a service calculated to give Great Britain one-minute postal contact with France and three-minute contact with Ireland.

The rocket will carry 1,200 letters, bearing special stamps, it was learned. It will be trained on Calais from Dover, or else across the Irish Sea, and the letters will be posted at the nearest postal point to where the rocket falls.

The speed of the rocket is estimated at 20 miles a minute.

## Queer Thing About Prices

## B.C. People Pay As Much For Apples As Londoners

It costs just as much to buy an apple in London or in the Sudan desert as it does in some parts of British Columbia. This is another of those "Believe It or Not" statements but it may be believed because it is absolutely true and the mischief of the situation is that there is no immediate method of remedying it. It does seem absurd that, while apples are grown by the millions in one section of this province, still so far as another section just a few hundred miles distant, is concerned, these apples might as well be grown on the canal river face of Mars—Country Life in B.C.

## Experimented Two Years

## Watchmaker Drilled Hole Through Pin From End To End

Henry Huss, watchmaker for the past 25 years in Meaford, Ontario, has succeeded in drilling a hole through a common pin from end to end without breaking it. Huss has been experimenting with this for two years, and the hole made with a fine drill is just large enough to thread a hair out of a man's head through it. The pin was put on display in his window and caused a great deal of interest. It is believed this is only the second time this has been accomplished in Canada, a watchmaker in Toronto having succeeded in doing it.

The supply of gossip seems never to equal the demand.

W. N. U. 2052

## Dr. Wernet's Powder For FALSE TEETH

## A Joy To All Users

## Can't Slip or Slide

Sprinkle on Dr. Wernet's Powder and you won't have to think about your false teeth. They will stay in place and hold place firmly in place—they positively won't slip or slide. Forms protective cushion for sensitive gums. Leaves no coating, gummy substance—keeps mouth sanitary, breath pleasant. Prescribed by world's most noted dentist. The cost is small—the comfort great. Any drugist.

## Means True Progress

## Strandline Train Promises Railroads New Lease Of Life

M. E. Tracy in an article in the New York World-Telegram says that eighty-five passengers are going with baggage and express 1,000 miles in thirteen hours and on \$17 worth of fuel is something new. It promises the railroads a new lease of life, capital new enterprise and labor new work. Best of all, it promises the traveling public more for its money.

We have needed something of the sort for five years. With all the experimenting little has occurred to thrill people. By and large they have been forced to fall back on the hope that the better which could be done was to rearrange what they had on hand.

Progress, which should be considered as synonymous with prosperity, is not made of that kind of stuff.

We are not going to find happier living conditions, much less happiness, by doing what we have always done in a different way. That is where political remedies fall.

Progress is a matter of invention and achievement.

Take this streamline train, for instance, and what does it imply?

It implies the scrapping of billions in rolling stock, the substitution of crude oil for coal, the abandonment of steam locomotives for Diesel engines, a great consumption of aluminum and a reduced consumption of fuel. It implies new operating and mechanical methods, the mobilization and training of new crews and a multitude of other drastic readjustments.

## Cenotaph Dedicated

## Canadian Legion Holds Impressive Service At Portland, Oregon

Flags representative of the United States, Great Britain and Canada, fluttering from a single flagpole, symbolized peace among English speaking nations at a memorial service of the British Columbia branch of the Canadian Legion. This service was the high point of the day's Rose festival program at Portland, Oregon.

To those of both Canada and the United States who died in the World War was dedicated the permanent cenotaph, from which the flagpole sprang.

"This is a gesture of international friendship," said Brig.-Gen. Alex. Ross, president of the legion. "It is perhaps unique because this is the first time a nation has erected a memorial to both the dead of a neighboring nation and its own dead."

A troop of Royal Canadian Mounted Police drew great applause when they marched on foot in the Canadian legion parade. Killed baggage bands, drum corps and legionnaires paraded with uniforms and colors of two nations.

The first pumpkin pies were made by cutting a hole in the pumpkin, extracting the seeds and fibrous matter, stuffing the cavity with apples, spices, sugar and milk, and then baking the whole.

"I don't know what to make of the lettuce in my garden," says a correspondent. He had better consult a salad recipe book.

United States, Brazil and Mexico are the most populous nations in the western hemisphere.

Heat of stars is measured by a device weighing only one one-thousandth as much as a drop of water.

## MATURITY—MATERNITY MIDDLE AGE

At these three critical periods a woman needs a medicine she can depend on. That's why so many take Lydia E. Pinkham's Vegetable Compound. 98 out of 100 say, "It helps me." Let it help you, too.

## LYDIA E. PINKHAM'S VEGETABLE COMPOUND

## Seeking Formula To Control Wheat Exports

## Left For Wheat Growers

Like the alchemist of old seeking a formula for transforming base metals into gold, a young red-headed Canadian, in a modern setting, is searching for a formula which will effectively control wheat exports and establish a minimum world wheat price system.

Andrew W. Brown, product of an Alberta farm, University of Alberta graduate and wheat pool statistician in turn, has won distinction unique as chairman of an international wheat commission created to help the lot of farmers of five nations.

Through his interpretation of complex wheat production problems, "Andy" has won appreciation and praise from United States and European co-workers. Quiet-spoken, deliberate in his thinking, this 35-year-old student from the Canadian prairies understands the language of wheat ranches and has found his niche in directing the distribution of a world wheat supply under the London wheat agreement.

His genius for organization has brought him a personal power where world wheat facts are discussed. At Rome and at London he has matched wits with the shrewdest wheat traders of four continents. Through his devotion to an ideal, a world-wide upheaval is being moulded into an economic entity.

He is the possessor of a doctor's degree from the University of Minnesota but it was under the watchful eye of Dr. E. J. Richard, in the research laboratory of the board of grain commissioners, that he capitalized on his start with the Alberta wheat pool.

## Australian Poet Honored

## Bust Placed In Poet's Corner Of Westminster Abbey

Adam Lindsay, an Australian poet of Australia, who has been honored by his bust being placed in the Poet's Corner of Westminster Abbey, is the first British Dominions poet to be so commemorated, and the first poet so honored since Tennyson, beside whom his bust stands.

The memorial volume by Major Douglas Sladen, on whose petition the monument has been erected, has been published, giving the story of Gordon's eventful life, his love affair, and his tragic death.

Gordon sailed to Australia "in the white flag" and "became successively a mounted policeman, a horsebacker and trainer, a member of parliament, and the most famous steeplechase rider Australia has ever known."

He died by his own hand in 1870. Buried with debts, and depressed by news that he had lost the case for the recovery of his ancestral lands (as head of the Gordons of Hallhead in Aberdeenshire) he went out into the scrub and shot himself—the day after he had published his last book of poems, "Bush Ballads and Galloping Rhymes."

## An Unusual Hobby

## Englishman Has Wonderful Collection Of Match-Box Tops

A nephew of Lord Kitchener of Khartoum, Major Pat A. Beckett, of Ye Old Plough Inn, Speen, a Buckinghamshire village, owns the largest collection of match-box tops in the world. He has 22,000 different tops, and they cover every available inch of space on all the walls in three rooms at his home. He has been collecting them for many years, and has travelled almost the world over in search of new designs. He has some of the first match-boxes which came into use, and a history of world progress can be traced in the colorful designs on the match-box covers which form a unique wallpaper at his country inn. A few years ago, ex-King Alfonso, who is also an enthusiastic match-box top collector, paid a visit to Major A. Beckett and spent several hours inspecting his collection. The king's collection was limited to a mere three thousand!

The average cost of producing hay on the Dominion Experimental Farms in the Prairie Provinces has been \$8.99 per acre, or 6.23 per ton for a yield of 1.44 tons per acre. Considerable variation in cost has occurred on different experimental farms, the cost per acre having ranged from \$5.93 at Swift Current to \$11.19 at Morden, while the cost per ton has varied from \$4.47 at Brandon to \$8.42 at Indian Head.

At a public dinner in London the chairman hoped that "the visitors will carry away with them some interesting souvenirs of their presence this evening."

## COLIC PAINS Ended!

"If my baby boys were restless with colic, I'd give them Baby's Own Tablets. Very often the cause of colic is indigestion. Baby's Own Tablets gently rid the digestive tract of the disturbance. Baby's Own Tablets really soothe the pain and stop the fuss. Mothers say nothing equals them. Mothers say Baby's Own Tablets are good and soothing young children need and something you can't give them when they're colicky. Absolutely safe. Price 50¢ at your drugist's."

## Dr. Williams' BABY'S OWN TABLETS

## Trying To Solve Puzzle

## Scientists At Chicago Seek Reason Why Midgets Do Not Grow

## Why is a midget a midget?

Scientists and medical men who have puzzled over this baffling question for years are congregated in Chicago to pursue their investigation to a fuller extent at the Chicago World's Fair this summer.

Nate T. Eagle, managing director of the new midget city at the fair, has extended an invitation to scientists to use the colony of little people as a "cinderella" to study the perplexing problem of why the midget never grew up.

The midget city will occupy the same location as it did last year but will be four times as large. It will be populated by the largest gathering of midgets of both sexes and all ages ever congregated in one place.

Although a midget's size is believed to be due chiefly to glandular disorders, no one has ever answered the question logically and scientifically.

## To Explore Ellesmere Island

## Oxford University Expedition Is Leaving England In July

Edward Shackleton, son of the late Sir Ernest Shackleton, famous Antarctic explorer, is organizing what will be known as the Oxford University Ellesmere Island expedition, which is to leave England in July aboard a chartered Norwegian sealer. The expedition is receiving the practical support of the Canadian government and the Royal Geographical Society.

Exploration and geographical survey of some of the hitherto completely unknown interior of Ellesmere Island, about 600 miles off Canada's Arctic coast, is the object of the expedition, which will be led by Dr. Noel Humphreys.

## OFF COLOUR? HOW IS YOUR LIVER?

## Wake up your Liver Bill—Without Calomel

Your liver's a very small organ, but it certainly can put your digestive and eliminative organs in a tizzy, by refusing to pour out the daily two pounds of liquid bile into your bowels. You won't completely cure this condition by taking salts, oil, mineral water, or cathartics or shaving soap, or roughage. When moved, your bowels they'll be through—and you need a liver stimulant.

Caster's Kidney Pills will soon bring back the sunshine into your life. They're purely vegetable. Ask for them at your drug store. Substitute. 25¢ at all drug stores.

## British Museum Buys Records

## Bible Contains Births Of First Children At Tristan Da Cunha

Bible records of the births of the first children at Tristan da Cunha, the lonely little British island of volcanic origin in the south Atlantic, 2,000 miles west of the Cape of Good Hope, have just been purchased by the trustees of the British Museum.

This Bible, which is an American one, dated 1831, was in the family of William Glas, the English founder of the Tristan settlement. In now faded ink it records Glas' marriage and the birth of 18 children, from whom many of the 700 islanders today are descended. The latest owner was Mrs. Annie Glas, a granddaughter of William Glas.

A gust of wind at 81 miles an hour, registered at Croydon in 1929, was the highest wind velocity ever noted in or near London.

Hang it in your kitchen. Full out one sheet of Waxed Paper at a time.

Appleford PAPER PRODUCTS HAMILTON, ONTARIO

## Irish Free State May Give Preference To Imports From Germany

LONDON.—President Eamon de Valera is arranging to issue an order at Dublin imposing additional tariff duties on several classes of British goods, which will make their cost considerably higher than that of German goods entering the Irish Free State, the Daily Herald said.

The order is being made under the Preferential Duties Act, which sets out that in future the Free State will only accord preferential rates to those countries with which Ireland has trade agreements. Tariff barriers against British goods were established in the course of trade repatriation between the two countries following De Valera's refusal to pay land annuities. The Daily Herald said a Free State-German commercial treaty is likely within the next few days. Representatives of German trading interests have been conducting negotiations during the last few days with the minister of commerce.

### Deal With Sweepstakes

Informers May Be Unable To Collect Cash If Legislation Changed

Ottawa.—The provision of the criminal code which makes it possible for an informer to sue and obtain the proceeds of a lottery will disappear if the amendment introduced by Hon. Hugh Guthrie, minister of justice, passes the House of Commons. The bill received first reading without discussion. Instead of the informer being able to obtain the proceeds, the measure provides that they shall be forfeited to the crown. The amendment does not apply to small raffles and church bazaars in which the amount involved is less than \$50.

### Bank Bill Approved

Ottawa.—The senate banking and commerce committee passed with two exceptions, the first 87 sections of the banking bill passed by the House of Commons, June 11. Section 35 dealing with annual and special statements of the chartered banks, and section 75, dealing with the business and powers of the banks, were held over for further consideration.

### Canada Has A Vote

Ottawa.—Although Canada was "in the happy position of having nothing to disarm," as member of the League of Nations she has a voice and a vote in disarmament discussions, and these privileges will be exercised when the time arrives, Prime Minister R. B. Bennett told the House of Commons.

## Ontario Premier-Elect Says Lieutenant-Governor Should Resign From Office

St. Thomas, Ont.—"Lieutenant-Governor Herbert A. Bruce of Ontario is one of the finest gentlemen in the country, but I feel he should resign," said Mitchell F. Hepburn, premier-elect, in discussing the general election which resulted in a Liberal landslide.

"I stated, during the campaign, Ontario could carry on very well with the chief justice officiating," he declared. "Sir William Mulock, an aged gentleman, managed easily to sign the few orders-in-council and act as lieutenant-governor before Col. Bruce was appointed. I want to make it clear there is no personal animosity between Col. Bruce and myself. I am of the opinion that, since the people endorsed my statements by voting for my party, he should take cognizance of that fact."

"I certainly intend to hold a special session of the legislature to deal with the unemployment situation if Premier R. B. Bennett withdraws, as he has announced, federal government grants to direct relief. There will be no pomp and glory connected with that session, for we will simply meet and try to formulate a constructive unemployment policy to help our people."

"I am going to carry out my election promise—every one of them. Those high-salaried officials who have been living on the fat of the land at Queen's Park might as well start packing now, for as soon as I get control they will be removed from office."

Ottawa.—High officials of the Do-

### Bumped By Sea Monster

Crew Of Schooner Has Exciting Experience Off Nova Scotia Coast

Yarmouth, N.S.—A night of terror aboard the auxiliary schooner Marjorie E. was described here by fishermen who declared a monster of the sea had almost lifted their vessel out of the water off the Nova Scotia coast.

"It happened Sunday night," related one of the crew. "The night was clear and all of us except the watch were in our bunks."

"Suddenly there was a thundering crash that threw three men from their bunks to the floor. One of them shouted 'We've been rammed—let's get out on deck.'"

"Out we scrambled to the moonlit deck and we were amazed to see in the swirling water the huge form of what appeared to be a whale."

"In frisking about the thing probably had risen directly beneath the ship and the force of the impact lifted her almost clear of the water, allowing it to plunge back with terrific force."

"We didn't know what to do, but we started our engines full speed ahead and left the scene in a hurry, you can bet!"

### Japan Keeps Plans Secret

No Information Given Out Regarding 1933 Naval Conference

London.—The Japanese have erected a diplomatic fence of secrecy around their plans for the 1933 naval conference despite assurances of the fairest treatment by representatives of Great Britain and the United States.

Matsuoka Matsudaira, Japanese ambassador, declined to tell Norman H. Davis, American representative in preliminary bilateral discussions, what are the present proposals and hopes of the Tokyo government.

After Davis had given Matsudaira an assurance that the Japanese would have no sort of Anglo-American understanding against Japan, he questioned the Japanese ambassador regarding his nation's plans.

### United States Buying Silver

Washington.—United States government has "in the past" used monetary policy into another field with the signature of President Roosevelt of the Pittman silver purchase bill. The measure directs buying of the metal by the treasury until it comprises 25 per cent. of the nation's metallic monetary stock.

minion government would not comment on the proposal of Mitchell Hepburn, premier-elect, of Ontario, that Lieutenant-Governor H. A. Bruce should resign. It was explained that the office and duties of provincial lieutenant-governors were laid down in the British North America Act and that they were appointed by the Dominion government.

Section 58 of the British North America Act states that "for each province there shall be an officer, styled the lieutenant-governor, appointed by the governor-general-in-council, by instrument under the great seal of Canada." A further section states that "...the salaries of lieutenant-governors shall be fixed and provided by the parliament of Canada."

Under constitutional procedure, Mr. Hepburn, as leader of the successful party in last Tuesday's election, will be summoned by Lieutenant-Governor Bruce when Premier Henry resigns and asked to form a government. He will be sworn in by the lieutenant-governor, and the legislature, when summoned, will be opened by the lieutenant-governor.

With respect to administrators, section 67 of the British North America Act states as follows: "The governor-in-council may, from time to time, appoint an administrator to execute the office and functions of lieutenant-governor during his absence, illness or other inability."

W. N. U. 2052

### Possession Of Firearms

Putting Teeth In The Law Against Illegal Use

Ottawa.—Canada is putting teeth in the law against the illegal possession of firearms.

An amendment to the criminal code introduced in the House of Commons by Hon. Hugh Guthrie, minister of justice, reaffirms that a permit is required before any resident of Canada can have rifles or shotguns in his possession that can be concealed about the person. To this section is added pistols and revolvers.

The penalty provided is a fine of \$100 or three months' imprisonment or both. This does not apply to hunters.

Apart from having a permit, the man in possession of a firearm must register it with the Royal Canadian Mounted Police or some authority named by the attorney-general of the province, or suffer a \$50 fine or 30 days in jail or both.

Another new section requires persons who repair weapons to report to the authority who issued the permit, the man owning the firearm.

### Startling Revelations

Investigations Uncover Activities Of U.S. Munition Industry

Washington.—Senator Pope (Democrat, Idaho), said that "startling revelations" concerning the activities of the United States munitions and war materials industry had been uncovered by investigators for the senate munitions investigating committee.

With Senator Nye (Democrat, North Dakota), committee chairman, out of the city, the investigators met and went over their reports with him. Pope said the people of the United States would be "amazed by the story of greed, intrigue, war scare propaganda and lobbying" during committee hearings.

He indicated the investigation would disclose an enormous "ring," interested in the propagation of wars and strife, which covers "far more than just the war materials industry."

### Payment On Loan

Canadian Pacific Railway Will Make Payment To Banks On July 3

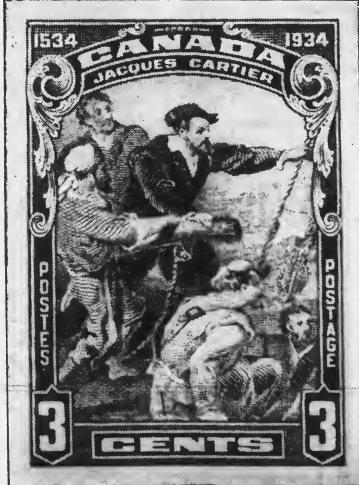

Ottawa.—The Canadian Pacific Railway Company will repay the chartered banks of Canada on July 3, \$12,000,000 of the \$60,000,000 loan guaranteed by the Dominion government, according to an order-in-council tabled in the House of Commons.

The order-in-council followed a report by Prime Minister R. B. Bennett which said the company asked the right to repay this portion of the loan on July 3, and this permission was granted by the government. Authority to the Canadian Pacific loan was established by the previous to repay at any time any part of the order-in-council.

### Canadian Cheese Good

Ottawa.—The quality of Canadian cheese in the United Kingdom was so satisfactory that no suggestions were offered by the largest importers on how further improvements could be made, said J. S. Singleton, Dominion dairy commissioner, on his return from London and Liverpool.

### SPECIAL STAMP COMMEMORATES DISCOVERY OF CANADA

Here is a reproduction of the special stamp to be issued by the Post Office to commemorate the 400th anniversary of the discovery of Canada by Jacques Cartier. The stamp is to be released on July 2nd.

### WINS IN SASKATCHEWAN

JAMES G. GARDINER

Liberal leader of Saskatchewan, who was returned to power by a sweeping majority.

### Saskatchewan Elections

Liberals Returned To Power By A Most Decisive Endorsement

Regina.—The Liberal party under the leadership of James G. Gardiner, were swept back into power in the Saskatchewan elections in a most emphatic manner. With the election of five or six Farmer-Labor candidates, the C.C.F. party will form the only opposition. Not a single government supporter was elected.

In an interview, Premier-elect Gardiner said the legislature would be assembled as soon as possible. There may be a special session to repeal the School Legislation Act passed by the now-extinct Anderson government.

This legislation, which would automatically come into effect August 1, would place educational matters in the hands of a commission, and "take education out of politics"—as Premier Anderson contended. But it was diametrically opposed to the Liberal policy, said Mr. Gardiner, and he was looking into the legal aspects of the legislation to see if a special session would be necessary to preclude its going into effect.

The campaign had been cleanly fought. The issues were clear and the policy of the Liberal party to enforce economy in administration, effect reconstruction and to improve the trade relations of the Dominion with other countries had been clearly approved.

### Much Depends On Weather

Moist Warm Days Will Greatly Lessen Grasshopper Menace

Saskatoon.—Extraordinarily early maturity of grasshoppers in Saskatchewan this year may save the crop from late damage by the flying "hoppers," in the opinion of K. M. King, in charge of the Dominion entomological laboratory here. If warm moist weather prevails, the mature "hoppers" quickly become infested with a disease which carries them off rapidly and the early development this year has pushed forward the mature age of the grasshopper into Saskatchewan's rainy season. Much depends on the weather. Given warmth and moisture the damage to crops by grasshoppers after the flying stage is reached may be much less than last year.

## Bilingual Bank Notes Rejected By Commons After A Heated Debate

Ottawa.—Climaxing a short, bitter debate in which tempers flew and the atmosphere was tense, the House of Commons voted 69-42 against the bilingual bank notes to be issued by the proposed central bank.

"This has nothing to do with a question of business but is a political subject pure and simple," almost shouted Premier R. B. Bennett when Hon. Ernest Lapointe, Liberal lieutenant in Quebec, moved the bilingual motion.

"I deny that," retorted the former minister of justice, and when a Conservative shouted above the tumult that denial was impossible, added "I send that back in your teeth."

The prime minister said he would abide by the letter of the constitution which placed French and English on a parity and "by that I stand and by that this government stands."

The prime minister argued against bilingual money from a constitutional viewpoint and told the former minister of justice he "some day would live long enough to regret" introducing the subject as a political question.

Hon. Mackenzie King retorted it was a question of promoting harmony between races and selecting a method of engraving bank notes

that would serve public convenience best.

It was the prime minister who raised the subject to the level of party politics, insisted the Liberal leader.

"No, no," shouted Conservative members, adding it was the former minister of justice.

"I say anyone who says I raised this question as a political issue utters an infamous lie," retorted Mr. Lapointe, but he was forced to withdraw the latter words on a point of order from the prime minister.

In the division, four French Conservatives deserted the government: Barrette (Berthier-Mackinac); Durion (Quebec-Montmorency); Durois (Quebec-Montmorency); and Larue (Quebec-Montmorency). Supporting the government were six Progressives and one Liberal, John Brown (Lisgar).

"Surely," asked the prime minister, "those who sit on one side of the house and follow the constitution should not be branded traitors. That is what has been going on in the Liberal press of Quebec on this subject."

Earlier the house turned down a motion from Hon. R. L. Ralston, Liberal financial critic, which would give the government a majority of the appointments to the board of directors of the public-controlled central bank. It was a straight vote.

### Public Works Program

Federal Government Plans Expenditure Of Forty Million Dollars

Ottawa.—The House of Commons has before it the government's public works construction program involving an expenditure of some \$40,000,000 on building operations scattered over the whole Dominion. It is intended to provide employment and stimulate business and industrial recovery. With little discussion the house passed the resolution preliminary to the introduction of the bill to provide for the construction program and gave first reading to the bill.

### Silver Export Higher

Ottawa.—Export of silver bullion in May more than doubled that of the corresponding month last year, while a substantial increase was shown in the value of gold bullion exported, the Dominion bureau of statistics says in a report.

### Gold Coinage Disappearing

Premier Bennett Predicts That Gold Redemption Of Currency Will Be Resumed

Ottawa.—Expressing the belief that gold redemption of currency would ultimately be resumed, Premier R. B. Bennett, in the House of Commons, prophesied that gold coinage would disappear.

Gold redemption would be resumed by the nation of the world "since apparently it is the only basis on which we can have any stability," but the redemption would be in bullion, not in coin.

### Canadian Printing

Ottawa.—The Canadian printing trade employs 32,584 men and women, says the Dominion Bureau of Statistics, and produced \$101,622,333 in 1932, \$36,312,989 representing daily newspaper output.

## Name Is Mentioned Of Sir Edward Peacock As Head Of Central Bank

Ottawa.—Mention of the name of Sir Edward Peacock by Prime Minister R. B. Bennett in connection with the government's plan for a new central bank, caused some speculation in parliamentary circles. Sir Edward is a Canadian who has had a highly successful financial career in London and holds a high position in the Bank of England.

Mr. Bennett, opposing an amendment, which would restrict selection of a bank governor to British residents in Canada, said this would be such a man as Sir Edward. He said it would be a bad principle to declare a Canadian born and educated, who had gone abroad and fitted himself for a high position would not be eligible for that position when it was open. The amendment was defeated on a standing vote.

Earlier Mr. Bennett said he had been informed the bankers of Canada were of the opinion that there was no man among them capable of taking over the control of the central bank. He was opposing a move launched by Maxime Raymond (Liberal, Beauharnois), to make the Bank of Canada bill require that the governor, deputy governor and assistant deputy governor be Canadians domiciled in Canada.

For commercial banking, Canada were as good as any in the world, the prime minister declared, but none of them had the necessary experience with the duties of a central bank to take over the management of such an institution.

In no other country in the world where a central bank operates is a greater measure of control exercised over that institution by the government than is proposed with respect to the Bank of Canada, Mr. Bennett told the house. In an exhaustive

analysis of the history and functions of central banks Mr. Bennett replied to many objections and criticisms from the opposition.

He referred particularly to an amendment proposed by Hon. J. L. Ralston (Liberal, Yarmouth-Sheila), which would give the government power to appoint four of the seven directors of Canada. The amendment came when the Bank of Canada bill was before the house in committee.

The aim of the bill, said Mr. Bennett, was to remove the bank from possible political influences. In general it was in line with the modern tendency of financial policy which was to regard central banks as "great public trusts" rather than as departments of state.

Mr. Bennett promised to give serious consideration to a suggestion from Rt. Hon. Mackenzie King, Liberal leader, that the new bank might be able to thwart the wishes of the government of the day in matters of trade and fiscal policy.

Mr. King said he feared this contingency might arise in the event of the directors of the bank, for example, favoring the development of trade within the empire and the government wishing to promote general world trade.

He could see no possibility of such a contingency arising, said Mr. Bennett, but the government did not wish to hand over to the bank any measure of control over fiscal policy. If Mr. King or any other member could show there was a danger of this and suggest a method of remedying it he would be glad to give effect to his views. In the meantime he would consider the matter further himself.

## NOTES AND COMMENTS

A SUGGESTION well worth acting on is that a sports and athletic association be formed by the younger people and their leaders. Older people have not the urge of younger people to engage in youthful pastimes. Golfing and curling satisfy their desires as age advances. Softball, baseball, football and hockey depend on young people for their popularity, and to interest the general public and obtain their support an organization is required. Will some of the leaders of the local clubs act on the suggestion? It will help to advance the standard of amateur sport and be beneficial to all concerned. Coleman should have a field day in which all summer sporting activities would be represented.

THE Radicalism of to-day becomes the Conservatism of tomorrow. Review the past 25 years in social legislation and you'll admit there is more truth than fiction in the statement. Social unrest prevails in all civilized countries, because conditions are forcing the masses to think more than in the past. Thinking usually begets action, and revelations of profits made from wars, exploitation in various forms from speculation to sweatshop methods of producing manufactured articles and other social injustices are revolutionizing world thought and action. Younger generations are asking why they should be saddled with debts which they had no voice in incurring.

NEWLY-ELECTED Premier Hepburn of Ontario boldly states he will reduce cost of government by doing away with the office of lieutenant-governor and high-salaried supernumeraries of the government—those chairmen and members of the 23 Ontario commissions, Costs of Federal and provincial governments in Canada combined with staggering debts on national railways are bearing too heavily on the masses, compelling them to demand a lightening of their burdens. Millions of workers who toil throughout their lives and cannot accumulate sufficient to prevent poverty in old age are bound to impress on younger people improvements in the administration of their affairs are vitally necessary to avoid degenerating into virtual serfdom.

REVELATIONS on sweatshop labor in clothing and boot manufacturing trades come as no surprise to those who long have realized that low prices could be fixed only at the expense of the humble worker. And one can find similar conditions in western Canada, Vancouver fostering just as vicious conditions in the boot trade where men work hard for \$7.00 a week.

NEARER home we find in the printing trade "scab" conditions, for The Journal quoted on a printing order the wholesale price of which for stock alone was \$19.00, the work, such as labor in composition, ruling, presswork and binding amounted to \$34.85, based on trade union prices prevailing in western Canada; yet a Calgary firm gave a quotation of \$22.00 on the job which a reputable Winnipeg firm of many years standing quoted at \$51.55.

ANOTHER job printing firm in Lethbridge is an offender when it comes to making competitive bids, for instances are known where it has "scabbed" unmercifully in order to secure business from firms trying to maintain a fair wage scale. The remedy for these conditions lies largely in the hands of the public, in refusing to purchase from firms who do not pay living wages to those who produce the goods. Workers never will have purchasing power while they are exploited and their health and well-being is impaired by being denied a living wage.

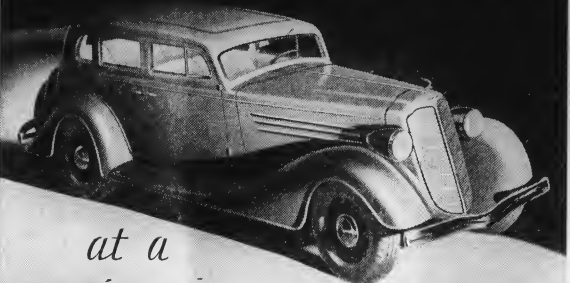

THE Douglas system of Social Credit excites comment in various parts of the province. In a discussion at Red Deer, a Mr. J. M. McDonald commenting on an address made there by a Mr. R. E. Ansley, of the Red Deer Social Credit Group, states:

"When you speak of Social Credit as something distinct from the sum total of individual credits—are you not assuming a degree of co-operative will and efficiency which does not yet exist—at least among populations such as our own? Your system may succeed some day, but it will be as the economic crown of an already highly perfected commercial life.

To seek to bridge the existing gap seems to me to spell an inflation of commonsense and to have more affinity with an act of religious faith than with sound deductions from existing social facts.

Some show a woeful lack of good manners in driving automobiles, in their disregard of the rights of pedestrians.

ALBERTA

Fourteen thousand eight hundred and forty-three happy holidaymakers can't be wrong, or so the Canadian Pacific Steamships expect to prove this summer with four short sea cruises by the Duchess of Richmond between Montreal and New York.

During the last three summers two Duchess liners have made between them eleven of the nine day trips, the popularity of which has been shown by the fact that 14,843 passengers were carried on these vacation cruises.

The Duchess of Richmond's cruise departures from Montreal will be on July 21, July 31, August 10 and August 20, and from Quebec the evening of the same day. Sixteen hours will be spent in New York on July 26, August 4, August 14 and August 24, with return to Montreal on July 30, August 8, August 18 and August 28. The day prior to arrival in Montreal eight hours will be spent in Quebec, with opportunities and facilities provided for exploration of the Ancient Capital and surrounding districts such as the Cote de Beauséjour, with its famous Shrine of St. Anne. Sightseeing trips in New York will also be arranged for those who wish to take them.

All the "trimmings" such as characterize a lengthier cruise have been planned for the Duchess of Richmond's nine day cruises, and each day of the trip down the majestic St. Lawrence and around the scenic coasts of Nova Scotia and New England will be a complete experience in itself. Facilities for enjoyment, both in exercise and relaxation, include an open-air swimming-pool, a gymnasium, deck-tennis, horse-racing, shuffleboard and many other sports, and also the opportunity for lazy do-nothingness, for which no better medium can be found than a comfortable deck-chair on a long sunny afternoon.

William Webber, who has directed all previous "Duchess" cruises to New York, will again be cruise director, and all manner of entertainment and organized enjoyment for the cruise members will be provided under his direction and that of the Staff-Captain and the Directors of Entertainment. In command will be Captain Arthur Rothwell, for several years commander of the Montcalm and recently appointed to the Duchess of Richmond.

### Boy Scout and Girl Guide Notes

Coleman Troops

#### Boy Scouts Planning on Camp at Waterton

Scout Master Reggie Jones, and T. Llewellyn, assistant scout master, and 24 Boy Scouts plan on leaving on July 4 for two weeks camp at Waterton lakes. Transportation arrangements have not yet been completed, but the boys hope to raise sufficient from the sale of flags on Saturday to complete their financial arrangements. To charter a special bus the cost would be too heavy, so that they are trying to make other arrangements.

It is hoped that the public will be as generous as possible in purchasing flags. The boys are trying to raise their entire expense by their own efforts, and a little help from everybody would put them over the top.

#### Girl Guides to McBain's Lake

Coleman and Blairmore Girl Guides will leave early next week, probably Tuesday, for their annual camp at McBain's lake, B. C. 42 girls are expected, under Mrs. R. P. Borden, district commissioner, as camp commandant, and Miss Yuill captain. Rangers also will attend, and will be in charge of the groups.

Mr. and Mrs. A. Beveridge visited friends in Calgary during the week end.

During the months of July and August The Journal will be sent to any address for 35c postage included. This will prove convenient to those going on holidays.

### ABOUT COLEMAN PEOPLE

JOE EDMERSON, secretary-treasurer of International Coal & Coke Co., Ltd., came from Newcastle, Eng. in 1903 to the Canadian Coal Co. In 1904 he came to Bellevue, with Mr. O. E. S. White, and until 1908 was with West Canadian Coal Co. Ltd., who at that time were also operating a mine at Lille, since abandoned.

In 1908, he came to the International Coal & Coke Co., Coleman, and has held the position of secretary-treasurer of the company.

Always keenly interested in outdoor sports, he has taken a prominent part as a player on the football team, and at present is president. His winter pastime is curling. A faithful member of the United church, he continues to give his services as organist. He is a past master of Summit Lodge A. F. & A. M., and treasurer.

In 1908 he returned to England and was married to Miss Josephine Joyce of High Spenn, Durham County. Following their wedding they came to Bellevue, later to Coleman. Their family of two sons and three daughters are Westerners. (Leslie, now married) and Joy, Betty, Peggy and Patricia.

The strawberry social held at Mrs. Pattinson's by the ladies of Minerva Chapter, O. E. S., last Thursday afternoon, proved very successful, members from neighboring lodges in addition to local members attending.

Magazines or periodicals, English or Canadian, would be welcomed by men at the airport camp. Address them to Project 68, Airport, Coleman, and leave same at post-office, where they will be picked up for camp delivery.

More and more women are looking to the store ads for guidance in shopping.

### LOCAL AND GENERAL

Mr and Mrs William Bell and daughter Mae were visitors to Calgary last week.

Mr and Mrs J. Hirst, accompanied by Mrs. J. Bell, motored to Calgary on Friday.

Mrs John Jackson leaves Saturday for Montreal to sail for Scotland to visit her old home. Mrs. Fairfull, a former Colemanite, also sails on the same boat for Scotland.

Jimmy Evans, star player of the Portland Buckaroos, who made a big reputation on their forward line last season, is home in Coleman for the summer. Jimmy's first start was in amateur hockey on the home team, later going to the coast, playing in brilliant style for Victoria and later for the Portland team, winning in two or three seasons the highest number of points for scoring goals.

Len Watkins was down for the week end, after returning to Edmonton to pack his furniture for removal to High River. He has secured a house there, and on Monday left with Mrs. Watkins and baby to take up residence, having recently been appointed manager of the newly opened Government store. Their Coleman friends wish them good luck in their new home.

Blairmore and Coleman baseball teams played to a 4-4 tie at Blairmore on Friday. Joe Kapalka, Bill Gale and John Atkinson pitched for Coleman; John Kapalka, catcher, Shannon, Herman and Houbrege pitched for Blairmore; Van Duren, catcher.

WORLD HAPPENINGS  
BRIEFLY TOLD

Fifty additional constables have been engaged on the Northern Ireland border to cope with cattle smuggling from the Irish Free State.

The Prince of Wales has accepted the presidency of the English-Speaking Union of the British Empire, it was announced in London.

Twelve new warships are to be built for the Polish navy, it was reported at Warsaw. They will be four mine sweepers, two destroyers and six submarines.

What is probably the world's largest modern lathe has just been made at Sheffield for the English Steel Company to adapt forgings up to 60 feet in length and 80 inches in diameter.

Once again, the fact that Britain has no intention of handing over Bermuda or any other territory in payment of the war debt to the United States was stated in parliament.

A court-martial found Augustine Waldemann, former premier of Lithuania, guilty of an attempt to overthrow the existing government, June 7. It condemned him to 12 years at hard labor.

Without fuss or ceremony, the bridge across the second narrows of Burrard inlet, connecting Vancouver with the north shore, was reopened for traffic after being closed nearly four years.

The birth rate in England and Wales was higher during the first four months of this year than in the same period last year, according to vital statistics made public recently. An increase of 906 births was recorded.

Export of silver bullion in May more than doubled that of the corresponding month last year, while a substantial increase was shown in the value of gold bullion exported, the Dominion Bureau of statistics says in a report.

## Four Trips Each Year

Air Mail Service For Fond du Lac Post Office

Between 8,000 and 10,000 letters from air mail collectors were carried on the inaugural flight June 16 between Fort Chipewyan and the new post office being opened at Fond du Lac, at the eastern end of Lake Athabasca, according to postal officials at Edmonton.

Information from Ottawa shows that the Canadian Airways, Ltd., which has the mail contract, will make four trips a year between the two offices.

## Establish Farm Schools

Prince of Wales Donates Sum For Child Emigration's Society Plan

The Prince of Wales has donated \$50,000 to the Child Emigration Society's scheme for establishment of farm schools in the Dominion for children from Great Britain, including a farm school in British Columbia.

With the support of the prince the society launched a campaign for \$500,000 to develop the scheme, which has proved very successful in Western Australia. Children remain at the farm schools five or six years.

It is estimated that 25,000,000 persons live in the 133,700 square miles of the Punjab region of India.

## Youngest On Baisley Team

Sergeant Don Brereton Is Member Of Winnipeg Rifles

Sgt. Don Brereton, lone representative of Manitoba on the Canadian Baisley team, is only 19 years of age and one of the youngest shots ever to win the honor of shooting for Canada against picked marksmen from South Africa, India, Ceylon, Australia and other parts of the empire. He is a member of the Winnipeg Rifles (Little Black Devils).

Sgt. Brereton began his rifle practice at the age of 12 under the tutelage of Lt.-Instructor T. Rutherford, with the Winnipeg Cameron Highlanders. In that year he won the cadet grand aggregate and has placed among Manitoba's outstanding riflemen in the Dominion shoot at Connaught ranges, Ottawa, four times since.

Only two other Westerners have been picked with Brereton for the squad of 18 sharpshooters to represent Canada. They are Lieut. S. Johnson, Wayne, Alta., and Sgt. K. Iddiolo, Calgary.

## SUNDAY SCHOOL LESSON

JULY 1

ABRAHAM AND THE DIVIDED KINGDOM

Golden Text: "Fidei goeth before destruction, And a hearty spirit before a fall." Proverbs 16:18.

Lesson: 1. Kings 11:26-43:31.

Devotional Reading: Proverbs 1:20-28.

Explanations And Comments

Jeroboam's Rise To Power, 11:26-28. Jeroboam, a young man of the northern tribe of Ephraim, was among the subjects of Solomon engaged in forced labor upon the adornment of Jerusalem, his capital. Solomon observed his efficiency and made him overseer of all the relays of labor furnished by the house of Joseph, the tribes of Ephraim and Manasseh—a position which enabled Jeroboam to stir up his fellow laborers' jealousy of the Southern tribes and hatred of Solomon the oppressor.

Ahijah's Symbolic Act And Its Meaning, 11:29-35. One day, as Jeroboam was leaving Jerusalem, intending to think, no doubt, of how he would "lift up his hand against the king" (see verses 26, and 37), the prophet Ahijah met him. The latter had come from the sanctuary at Shiloh for this express purpose. Taking Jeroboam aside into a field where they were alone (compare Samuel's delivery of a similar message to Saul, 13:4-7), Ahijah took hold of the new garment he was wearing and tore it into twelve pieces, ten of which he handed to Jeroboam, saying that the kingdom was to be taken away from King Solomon and Jeroboam should be ruler over ten of the tribes. It was quite customary to enforce important communications by symbolic acts. Compare 1. Kings 22:13; Isaiah 20; Jeremiah 19:1-12; Ezekiel 12; Zechariah 11:7, 12, 14.

The Condition To Be Fulfilled, 1. King 11:37-39. Ahijah repeated God's promise that Jeroboam should be king over Israel. "The seed fell on prepared soil, and Jeroboam's formed plans would be consolidated and fixed. The scene is like that in which the witches foretell to Macbeth his dignity. Slumbering ambitions are stirred, and a half-naked prophet is finally disclosed by this glimpse into the future."

There was, however, a condition to be fulfilled. He would have a "sure house," or long line of descendants upon the throne of Israel, provided he hearkened unto God's command and kept them as David had done. The condition was not fulfilled, and his house came to an end in the second generation.

## Newest In Air Transport

German Inventor Has Patent For Steam-Driven 'Plane

Another invention in connection with airplanes is being talked of in Europe. It is stated that this project will be the most revolutionary development in air transport since the first aeroplane was built and is foreshadowed by a German inventor. He has just patented a steam-driven aeroplane which he claims will fly at 270 miles an hour for sixty hours or more non-stop. This astonishing claim means that any ordinary aeroplane could attain Schneider trophy speeds; and that an airman could fly from Europe to the Far East or South Africa in three days without coming down for fuel. Crossing the Atlantic to North or South America would be a short and easy journey.

The inventor is named Huetner and he is managing engineer of the biggest power station in Berlin, a man whose reputation would not allow him to make wild claims. His revolutionary new engine is a steam turbine, of the type used in ships, and he has succeeded in making it so light that it is no heavier in proportion to horsepower than the present petrol engine. Moreover, there is no risk of fire and explosion, which now costs so many airmen's lives. Brandon Sun.

## Is Really Resting

The woman who dances on spindly heeled shoes is really resting, the West Virginia Osteopathic Society was told. "When a woman puts on high-heeled slippers and goes out to dance she is giving her feet a beneficial rest," said Dr. H. E. Cliborne, of Columbus, O. "The change to high-heeled slippers changes the muscular pull of all the muscles and gives the feet a rest."

## Little Journeys In Science

ANÆSTHETICS

(By General H. Guest, M.A.)

Acclaimed as "God's greatest mercy brought by man to man", ether was first used in surgical operations nearly 88 years ago. The first demonstration took place in the Massachusetts General hospital at Boston on October 16, 1846, when William T. G. Morton, a young Boston dentist demonstrated that this anæsthetic could be used successfully in the performing of operations.

Although Dr. Morton is credited with giving the first demonstration of the use of this anæsthetic before a group of medical men it is understood that a Dr. C. W. Long, of Jefferson, Georgia, had previously used it to some extent in his practice. Following Dr. Morton's demonstration, the use of ether was quickly adopted by medical men on this continent and abroad. This new development brought about a great revolution in surgery and did away with the gruesome scenes which had formerly been associated with operations during which the patient did not lose consciousness.

In 1844 Humphry Davy, the English scientist known throughout the world for his invention of the Davy Safety Lamp, used by miners, did some work with nitrous oxide, better known as laughing gas. This gas proved to be a satisfactory general anæsthetic and is widely used for this purpose.

With the discovery of ether and laughing gas, scientists became interested in this new field and it was not long before chloroform was produced. Dr. James G. Simpson and Thomas Nunnally being outstanding in this work.

Ethylene is another anæsthetic which was introduced in later years, and which was found to have many advantages for surgical work. Acetylene is also used as an anæsthetic, but is not as common as the others.

In addition to the value of anæsthetics in relieving suffering during operations, they have benefited humanity greatly by making it possible for scientists to study various diseases and to find cures for them. Animals, studied under the influence of anæsthetics have been the objects of many researches which have brought about great benefits to the race.

## Recipes For This Week

(By Betty Barclay)

## MINCE MEAT MOLASSES COOKIES

9 ounce package dry condensed mince meat

- 1/2 cup water
- 1/2 cup butter
- 1/2 cup brown sugar
- 1 egg
- 1/2 cup molasses
- 3 cups flour
- 1 teaspoon soda
- 1/2 teaspoon salt
- 1/2 teaspoon ginger

Boil dry condensed mince meat and 1/2 cup of water for 3 minutes or until mixture is almost dry. Cream butter and sugar together. Add beaten egg and molasses. Mix in 1/2 cup flour, soda, salt and ginger. Add dry ingredients to butter mixture gradually. Fold in cooled mince meat. Drop by spoonfuls on buttered cookie sheet and bake ten minutes, or until brown in a moderately hot oven (375 degrees F.). This recipe makes 4 1/2 dozen cookies.

## SPRING SALAD

- 1 package lemon or lime-flavored gelatin
  - 1 pint warm water
  - 1 tablespoon vinegar
  - 1 cup nut meats, chopped
  - 2 cups cucumber, diced, salted and drained, or
  - 1 cup celery, diced
- Dissolve gelatin in warm water. Add Vinegar, Chili. When slightly thickened, add nuts and cucumber. Turn into mold. Chill until firm. Unmold on crisp lettuce. Serve with mayonnaise. Serves 8.

## New Super-Cunarder

Surprising Details Of Vessel Now Being Built In Clydebank Shipyard

The enormous size of the funnels to be placed in the new super-Cunarder, now designated as the 534 in the Clydebank shipyard, Glasgow, may be visualized when compared with the various tubes and tunnels in operation in New York City. The glazier's stacks will be in the neighborhood of 100 feet in circumference. The diameter will be approximately 30 feet. Thus it will be greater than any of the following:—Holland Tube, 29 feet 6 inches; Pennsylvania R.R. Tubes, 23 feet; East River Tubes, 23 feet; New York Central Tunnel, 25 feet; Harlem River Tunnel, 15 feet, 9 inches; 60th Street Tunnel, 18 feet.

The forward funnel will be more than 70 feet in height from the boating deck, the two other funnels decreasing in height. From the keel to the top of the forward funnel will be approximately 180 feet, equivalent in height to a building of 15 stories. The funnels of the funnels was reached after many demonstrations in a specially constructed wind tunnel. More than 30 model funnels were test.

A highly important job is taking place in the shipyard in connection with the fitting of the immense rudder. Constructed at Darlington, this rudder weighs nearly 140 tons and is by far the largest ever made. It is at present in the shipyard at Clydebank where expert workmen are engaged in assembling the various component parts. When this job is completed and tests carried out to ensure that the rudder will be perfect, the rudder will be dismantled and transported in sections to the liner berth where it will be re-assembled and fitted on to the ship.

Other tests which have been carried out include those to determine the design and form of the liner, in which over sixteen models were used for over four thousand experiments run carried out in the experimental tank; the wind tunnel experiment in which models of 30 funnels were used, to decide the design and shape of the great funnels and to make sure that the funnels and ventilators of the ship will be kept clear of funnel gases and the experiment made to ascertain the exact position on the bows of the hawsepipes. For the latter purpose shipwrights erected in the shipyard a wooden replica of the immense bow of Number 534 and with a model of the hawsepipes and another model of the anchors a series of tests were made, perfection in action being finally achieved.

In the series of cabins being constructed ashore for testing purposes, everything that goes into a stateroom in all three classes of accommodation will be given a critical try-out. The rooms will be exact replicas of similar rooms which it is intended to build into the ship.

The designers and furnishing experts will fit out the model rooms down to the last detail. Numerous designs in wall decorations, curtains, carpets, and other hangings will be tried out; furniture, beds, wardrobes, easy chairs, etc., will be installed until the experts are satisfied that the decorative and furnishing schemes provide the maximum of comfort and attractiveness.

An important feature will be the demonstrations carried out in regard to the heating, lighting and ventilation of the rooms. Scores of these experiments will be made to make certain that the perfect ease and comfort of the passengers will be assured.

These model cabin experiments are another remarkable instance of the meticulous care and attention which is being paid to the construction of this great ship.

## Journey To North

Party Of Students To Take 1,000 Mile Voyage Down Mackenzie River

Bayne Beauchamp, Honolulu English professor, will lead a party of 11 "teen-aged white boys from Punahou school, Honolulu, and four American lads on a 1,000 mile voyage this summer down the Mackenzie river, through the northwest territories and into sub-Arctic Canada to Alaska. They will build themselves at Athabasca, Alta.

Tentative plans call for an overland trip by automobile to Edmonton and thence to Athabasca, where they will construct six boats for the trip down the Mackenzie to Alaska. After a summer of exploration and field study, they will travel by aeroplane over the Divide to Nome, Alaska, or Valdez Island.

## Agricultural Notes

Many Items Of Interest To The Western Farmer

Tests at the Rowett Institute, Scotland, showed that oats made a suitable feed for pigs in any form except oatstraw.

Pleuronema among goats was introduced into Greece from Asia Minor in 1928 and has recovered every year up to 1931.

During the month of April, 4,866,637 bushels of wheat were ground in Canadian mills. The daily capacity of mills reporting during the month amounted to 96,795 bushels.

In Canadian first grade creamery butter, salting must all be dissolved and not over two per cent in butter for the British market unless the grader is notified that the butter is for a special market.

The chief object of the new Canadian rules and regulations governing commercial poultry hatcheries is to ensure an adequate supply of chicks at commercial prices and of such quality that they will develop into profitable producers on the farms.

Flour production in Canada for the month of April amounted to 1,088,785 barrels, which was higher than for the corresponding month of last year, when 1,013,486 barrels were produced, and slightly above the production of the previous month.

Nitrogen is taken up by plants from the soil in the form of nitrates, but however abundant the nitrates may be they cannot be utilized by plants without an available supply of water because nitrates enter the root in solution.

Studies conducted at the yellow fever laboratory of the Rockefeller Foundation at Bahia, Brazil, have shown that yellow fever virus may remain alive in chicken mites and in ticks of adult fowls and dogs for a considerable period.

Well over one half of the wheat acreage of North Africa is devoted to durum wheats, Algeria and Morocco producing particularly high proportions of this kind. The main markets for North African wheat are found in France and Italy.

Remarkably vigorous tomato plants have been grown out of seeds at Fairbanks, Alaska, under continuous daylight for six weeks, despite the reports that daylight artificial, or artificial and daylight exposures of 17 hours or more are injurious to tomatoes.

Trials at the Kentucky Experiment Station of fermenting cornstarch as a substitute for horse manure for heating hotbeds indicated certain advantages for the cornstarch, such as greater uniformity of heat, provided the stalks were cut into short lengths and thoroughly wet.

Experiments in banana breeding have been carried out by the Imperial College of Tropical Agriculture at Trinidad, British West Indies, since its inception as the West Indian Tropical College in 1922. This is of special interest to Canada on account of the Dominion's close business relations and active participation in the banana trade of the West Indies.

## Care Of Rubber Belting

Vegetable Castor Oil Will Keep It In Good Condition

A cheap and effective method of keeping a rubber belt in condition and to prevent slippage is to apply 20 to 30 drops of vegetable castor oil once a week on a small rubber belt, or about one-fourth to one-half ounce on a multi-strand belt. Mineral oil of any kind should never be used on rubber belts. Most commercial belt dressings are not suitable for rubber belting and should not be used except on the advice of the belting manufacturer. Rubber belts should be left on the pulleys, day and night, rain or shine.

When you hear a grasshopper chirp, you can be sure it is warmer than sixty-two degrees Fahrenheit. The insect is silent at colder temperatures.

Employment in Belgium is now above last year's figures.

Personal and Local

Rosch Cousins returned from three weeks holidays in Vancouver.

Betty Palfry, of Wetaskiwin, is visiting her cousin, Prue Borden.

Mrs. A. S. McLintock was a Calgary visitor during the week end.

Mrs. E. V. Peet won the sweater raffish by the Girl Guides Association.

H. Ott travelled to Lethbridge on Friday to attend the funeral of his niece.

Mrs. J. Michalsky entertained a number of friends on Wednesday in honor of Mrs. A. Branam.

Calgary visitors during the past week included Mrs. W. H. Garner, who visited Mrs. Fairfull, and Mrs. M. W. Ferguson.

F. P. Marshall of Coeur d'Alene, Idaho, was visiting his son Frank at the Michalsky mill on Monday.

Miss May Powell left on Wednesday for her home in Edmonton for the midsummer holidays.

Miss Belle Flynn has completed her University studies, being graduated with the degree of Bachelor of Commerce. Congratulations!

The Coleman football team have been drawn against Bellevue in the Blairmore football tournament on Monday. Game starts 9.30 a.m.

Looking for a peaceful place, a porcupine took up its abode under the house doorstep of S. B. Ryan at present a grass widower. Some boys did not permit it to rest, and poked it from its retreat, but Alex Easton corralled it and gave it protection.

Miss Jean McLintock of Winnipeg is visiting her brother and sister-in-law, Mr. and Mrs. A. B. McLintock.

Mayor Pattinson is attending the annual convention of the Alberta Union of Municipalities at Edmonton.

W. H. Moser of Hillcrest was appointed as a delegate from the musical festival committee to attend a meeting to be held in Calgary to organize an association, on July 2-3-4.

Subscribers having received statements during the past two weeks are kindly asked to attend to same. We thank those who have already responded.

A shower in honor of Miss Mary Haman was held at the home of Mr. Jack Richards on Friday, at which about 30 were present. The rooms were decorated with cut flowers and pink and white streamers, with a wedding bell as the centerpiece. Many nice presents were bestowed on the bride to be, who acknowledged the kindness of the hostesses and guests.

**Tennis Notes**

Keen interest is being taken by tennis players in the forthcoming Grows Nest Pass tennis tournament to be held on the local courts July 1-2.

Two entries have been received from Cardston and eleven entries were received from Lethbridge players yesterday, including that well known player, Mrs. Aut. Wilson. Entries have been promised by Bellevue, Blairmore and B. C. clubs.

Beautiful prizes have been bought by the tournament committee and they will be presented to winners and runners up. One of Coleman's leading citizens is being approached to present the prizes at the close of the tournament, Monday.

Last year's winners and defending champions are;  
Men's Singles: W. Balloch.  
Ladies Singles: Mrs. S. Short.  
Men's Doubles: Balloch and Lindoe.  
Ladies Doubles: Short and Graham.  
Mixed Doubles: Balloch and Lindoe.

The courts and grounds are being put in first class shape and rank among the best in Alberta and with some of the competitors having provincial ranking the tournament should be the most successful ever attained.

**Interesting Talk by G. Cruickshank**

G. E. Cruickshank, M.L.A., at a meeting of the Men's Brotherhood on Tuesday reviewed some of the legislation of the last session of the Alberta legislature, visits of unemployed delegations, the address of Major Douglas on social credit and other points of interest. The address was preceded by a supper. H. T. Halliwell was chairman; O. E. S. Whiteside proposed the vote of thanks to the speaker, and Rev. R. C. Taylor thanked the ladies. F. Antrobus, Walter Dibble and A. Webster were appointed a committee to complete arrangements to have a circulating library here, the books for which are sent out by the extension department of Alberta university.

**A Job for Solomon**

Here's a knotty knot that's going to take more than a Philadelphia lawyer to untie. W. Badham owns a 25 ft. lot between the Italian hall building and the Oddfellows hall. At least he purchased it as a 25 ft. lot, but finds he has only 24 ft. 8 inches, that being the overall measurement of his building and land. As to who is encroaching 4 inches is a matter of conjecture. L. Lindoe, surveyor, according to Mr. Badham, states that the Oddfellows hall is four inches on his lot. These buildings have been erected for many years, consequently there will have to be some delving into old records and surveys to find where these missing four inches are of Badham's property. If every building is four inches on

the next person's lot, then one can imagine the time there will be straightening the tangle. They will have to move them all four inches down the block to the Coleman hotel or—well—we'll leave it to somebody with more knowledge than a newspaperman to figure out

**Printing Prices**

Retailers are frequently quoted prices on printing by travelling salesmen on minimum quantities of 5,000 envelopes or letter heads, which they compare with the price paid for 500 or 1,000 only from the local printer. Of course, the small quantity costs higher, but 5,000 from the local printer can be obtained at equally as good a laid down price. How many retailers order 5,000 at a time? The Journal has never had a 5,000 order of any kind of a form from any retailer, and not even has been asked for a quotation on this quantity. We would welcome such requests with beaming smiles and the best cigar in town, just like the travelling salesman.

"The Family Clothier" Main Street, Coleman

St. Alban's Guild held a social in the parish hall last Thursday and the prizes were won by Mrs. Dan Griffiths and Mrs. George Derbyshire. Mrs. Clifford won the raffle prize.

Coleman Red Sox went down to defeat on their own grounds, Monday evening, when they took the short end of a 10-7 score from Hillcrest. Batteries for Hillcrest: Elick, Makin; Coleman: Yagos, Richards.
